

RASHMI RAWAT

AI Engineer | Full Stack Developer (MERN)

Gwalior, Madhya Pradesh, India | github.com/RashmiRawat675 | linkedin.com/in/rashmi-rawat-492529297

PROFESSIONAL SUMMARY

B.Tech Information Technology graduate with hands-on experience in **Full Stack Web Development and AI Engineering**. Built applications using **React.js, Node.js, Express.js, MongoDB, PostgreSQL and REST APIs**, along with practical experience in **LLM applications, Prompt Engineering, RAG, vector databases, RAG evaluation, AI agents and LangGraph**. Experienced in integrating LLM APIs with backend applications and building AI-powered workflows. Currently seeking entry-level opportunities in **AI Engineering, Full Stack Development, React Development, or Application Development**.

TECHNICAL SKILLS

AI / LLM Engineering: LLM Applications, Prompt Engineering, Structured Output, RAG (Retrieval-Augmented Generation), RAG Evaluation, AI Agents, ReAct Pattern, Multi-Agent Systems, LangGraph, Context Retrieval & Evaluation, Groq API

AI / Data Tools: Qdrant Vector Database, Embeddings & Semantic Search, Precision, Recall, Faithfulness, Relevancy, Correctness, Knowledge Base / Document Retrieval

Backend Development: Python, FastAPI, Node.js, Express.js, REST APIs, JWT Authentication, API Integration, Streaming Responses, File / Document Processing

Frontend Development: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Web Design, Vite

Databases: MongoDB, PostgreSQL, Qdrant

Programming: Java, Data Structures & Algorithms, Python

Tools & Technologies: Git, GitHub, Postman, VS Code, uv, Razorpay, Environment Variables / API Configuration

PROJECTS

Personal Portfolio AI Assistant

Python | FastAPI | Groq | LLM | RAG Concepts | HTML | CSS | JavaScript

- Built an AI-powered portfolio assistant that allows recruiters and visitors to interact with a candidate's professional profile through natural-language questions.
- Developed a **FastAPI backend** for handling AI queries, resume processing, job-description parsing and streaming responses.
- Integrated **Groq LLM APIs** for generating contextual responses based on candidate information.
- Implemented resume document processing using Python libraries and created a cached resume context for repeated queries.
- Added a **Job Description parsing workflow** to process uploaded JDs and use them as additional context for AI responses.
- Built a responsive portfolio interface with a persistent sidebar and recruiter-focused navigation.
- Deployed the FastAPI application to a cloud environment and configured production environment variables.

StaySmart — AI Hotel Management Platform

React.js | Node.js | Express.js | PostgreSQL | AI | JWT | Razorpay

- Developed a multi-hotel management platform with separate workflows for users, hotel owners and administrators.
- Built REST APIs using **Node.js and Express.js** for authentication, hotels, rooms, bookings, payments and AI-related functionality.
- Implemented **JWT-based authentication and authorization** for protected application workflows.
- Integrated **Razorpay** for online booking/payment processing.
- Built an AI-assisted hotel search and interaction workflow to improve hotel discovery and user experience.
- Used **PostgreSQL** for structured application data and relational booking workflows.
- Developed the frontend using **React.js, Vite and Tailwind CSS** with responsive UI components.

GitHub: github.com/RashmiRawat675/StaySmart

RAG Evaluation & Knowledge Base System

Python | RAG | Qdrant | Embeddings | LLM | Evaluation

- Built a document-based knowledge retrieval system using a structured knowledge base and semantic search.
- Used **Qdrant Vector Database** for storing and retrieving relevant document chunks.
- Implemented metadata-based filtering for targeted retrieval from the knowledge base.
- Designed a **golden evaluation dataset** containing questions and expected answers/contexts.
- Evaluated retrieval and generated responses using metrics including **Precision, Recall, Faithfulness, Relevancy and Correctness**.
- Compared retrieved context against expected context to understand retrieval quality and LLM response quality.

- Worked with chunking, embeddings, vector search and context selection as part of the RAG pipeline.

LangGraph AI Agent

Python | LangGraph | LLM | AI Agents

- Built an AI workflow using **LangGraph** to understand stateful agent-based application design.
- Implemented graph-based execution with nodes, state and controlled workflow transitions.
- Explored agent reasoning and tool/workflow orchestration using LangGraph.
- Worked with LLM-powered decision-making and multi-step execution patterns.
- Applied concepts learned from ReAct and AI agent architectures to practical workflows.

E-Learning Platform

React.js | Node.js | Express.js | MongoDB | JWT | Razorpay

- Developed a full-stack e-learning platform using the MERN stack.
- Implemented user authentication using JWT and backend REST APIs.
- Integrated Razorpay for course/payment workflows.
- Built frontend components and course-related interfaces using React.js.
- Used MongoDB for storing application and user data.

AI ENGINEERING / LLM APPLICATION DEVELOPMENT

2026 — Hands-on learning and project development covering:

- Prompt Engineering, LLM API Integration, Structured Output
- ReAct Architecture, Streaming LLM Responses
- RAG Architecture, Embeddings & Vector Search, Qdrant Vector Database, RAG Evaluation
- AI Agents, LangGraph, Multi-Agent Systems
- FastAPI-based AI Applications, Document Processing, LLM Evaluation

FULL STACK DEVELOPMENT TRAINING

Coding Thinker — Java + MERN Stack Training | Sep 2025 – Apr 2026

- Java and Data Structures & Algorithms
- HTML, CSS, Bootstrap and JavaScript
- React.js, Node.js and Express.js, MongoDB
- REST API Development, Full Stack Application Development
- Git and GitHub

EDUCATION

Bachelor of Technology — Information Technology

Rustam Ji Institute of Technology, Tekanpur, Gwalior | RGPV University | 2026

CGPA: 7.32 / 10

ADDITIONAL PROJECT EXPERIENCE

- Weather Application — React.js, Vite, Tailwind CSS, Express.js, OpenWeather API
- E-Commerce Application — React.js / MERN Stack
- Food Ordering Application — React.js
- Book Management Application — JavaScript, Local Storage

CORE STRENGTHS

- Full Stack Web Application Development
- AI/LLM Application Development
- RAG & Vector Search
- AI Agent Workflows
- API Development & Integration
- Problem Solving
- Data Structures & Algorithms
- Git/GitHub-based Development
- Learning & Implementing New Technologies
